WORK EXPERIENCE

Software Development Intern

📅 July 2023 – Present

NeoPhyte Ambient Intelligence

- As a software development intern, I made significant contributions to the front-end and back-end development of the project. Created models, schemas, and APIs using **Node.js, Express.js, and MongoDB** with focusing on making use of the **aggregation pipeline** provided by MongoDB.
- Developed captivating user experiences using **React JS, Redux, Tailwind CSS, and Material UI** in frontend projects. Ensured smooth frontend-backend integration through cross-functional collaboration.

Summer Intern

📅 May 2023 – July 2023

e-Yantra IIT, Bombay

- Developed a **3D Museum Website** for an international e-Yantra School Robotics competition. Designed virtual rooms, lobby, networking zone, and exhibition booths for an immersive experience.
- Closely worked with the **Django** and implemented authentication features, ensuring secure access to the platform. It also introduced a user-friendly feature allowing users to upload and delete models, with admin permission, enhancing the overall functionality and user experience.
- Built a **networking zone** for the participant of international e-Yantra School Robotics competition using **Django, JS, & Tailwind CSS** where they can post their thoughts on this museum and they can also interact with other participants.
- Certificate of Completion**

PROJECTS

Cosmopolitan - Multi-Ethnic Fest of NIT Rourkela - [multiethnicfest.com](#)

- Lead the development team in building a highly interactive website for NIT Rourkela's multi-ethnic fest.
- Developed the front-end using **Next Js, React, JavaScript, Tailwind CSS**
- I worked on creating user-friendly complex **website animations** using the mentioned tech stacks to enhance the overall user experience.
- Live**

Live Code - [live-code-mu.vercel.app](#)

- Created a real-time collaborative coding platform with Socket.io, allowing users to set up rooms for live feedback in a shared editor.
- Enabled language selection with syntax highlighting for students and real-time notifications for joining, leaving, and updates.
- It is a learning-based project for me and I used **Node JS, React JS, Socke.IO, Material UI, Tailwind CSS** for this project.
- Live**

DigIT-Hack - <https://www.digithack.in/>

- Developed a professional website for **DigIT-Hack**, a business providing IT services, using **React Js and Tailwind CSS**.
- Oversaw the site's deployment and hosting on **GoDaddy**. Responsive design ideas were put into practice to improve user engagement and experience by allowing for optimum viewing across devices.
- Live**

EDUCATION

B.Tech Mechanical Engg. | 2021-25

NIT Rourkela | 7.63 till 6th sem

Intermediate | May 2021

Vikash Residential School | 96.4%

Matriculation | May 2019

Jawahar Navodaya Vidyalaya | 92.6%

PROGRAMMING SKILLS

Programming Languages

JavaScript, TypeScript, Python, Java

Industry Knowledge

OOPS, Data Structures, Web Development

Frameworks and Libraries

React js, Redux, Next js, Node js, Express js, Django, Tailwind CSS, Material UI, Bootstrap, Mongoose, MongoDB, MySQL

Tools and Technologies

Git, GitHub, netlify, render, cPanel

Languages

English, Hindi, Odia

ACHIEVEMENTS

e-YRC | 3rd Rank - [Certificate](#)

- I was part of a successful team that competed in the **e-YRC(e-Yantra Robotics Competition)** held on IIT Bombay in association with MHRD for the theme 'Pharma Bot', securing an impressive 3rd place
- Live Video**

PORS

Web & Automation Lead - Cyborg

- Cyborg is the official Robotics and Automation club of NIT, Rourkela, and I am the Web and Automation Lead of that club.

Cosmopolitan

- Serving in the festival's management team, enhances my ability to take on responsibilities effectively.

CRSI-2023

- Volunteered for the NITR's one of the official website CRSI-2023, contributing to its development and maintenance.
